

## MDOT REGIONS AND TRANSPORTATION SERVICE CENTERS

# BAY REGION

The Bay Region includes 13 counties in the Saginaw Bay area. They are: Arenac, Bay, Clare, Genesee, Gladwin, Gratiot, Huron, Isabella, Lapeer, Midland, Saginaw, Sanilac and Tuscola. Major state trunklines include: I-75, I-69, US-127, US-23 and US-10. The Bay Region's top priority is to serve the Flint, Saginaw, Bay City, and Midland industrial centers with national and statewide corridors for the movement of people and goods to enhance international trade as well as interstate and intra-state tourism. Other important priorities to the Bay Region include providing a seamless transportation system to the region's agricultural industry. By doing so, the region's status is preserved as a leading producer of sugar beets and worldwide exporter of beans.

### Five-Year Road and Bridge Program

The road and bridge preservation projects identified in this 2009 to 2013 Five-Year Transportation Program for the Bay Region total approximately \$386 million. Investment is allocated in the following manner:

BAY REGION	TOTAL 2009-2013
Road Preservation	\$214 million
Bridge Preservation	\$98 million
Road and Bridge CPM	\$74 million
Total 2009-2013	\$386 million

*(Amounts are rounded to the nearest million dollars)*

Capital Preventive Maintenance (CPM) projects are planned for a significant number of pavements and structures that do not require extensive repairs during this Five-Year Transportation Program period. CPM projects are short-term fixes, adding from five to 10 years of life to a pavement or maintaining the existing structure condition.

BAY REGION	Route Miles of Road	Number of Bridges and Structures
Total in Region	1,509	1,028
Scheduled Work	55	73
Percentage of Region	4%	7%

The 2009-2013 program for road preservation work reflects approximately 55 miles (four percent) of the Bay Region's more than 1,509 route miles of state trunklines. The 2009-2013 program for bridge preservation work will address 73 (seven percent) of the region's 1,028 trunkline bridges and structures.

There are also a number of programs that are selected based on statewide priorities or where project identification is completed throughout the year. These investments are not reflected above, but are included in the statewide investment strategy.
