

# METRO REGION

The Metro Region serves four counties in south-eastern Michigan: Wayne, Oakland, Macomb, and St. Clair. These four counties encompass 161 cities and townships that are served by state trunklines. The Metro Region has the largest population concentration in the state and the oldest and busiest freeways. Forty-three percent of the vehicle miles traveled on Michigan’s freeway system are in this region. While there are slowing trends in land development due to economic conditions, there are some signs of redevelopment in urban centers throughout the Metro Region. This includes increasing densities of land use adjacent to existing trunkline right-of-way.

## Five-Year Road and Bridge Program

The road and bridge preservation projects identified in this 2009 to 2013 Five-Year Transportation Program for the Metro Region total approximately \$964 million. Investment is allocated in the following manner:

METRO REGION	Total 2009-2013
Road Preservation	\$560 million
Bridge Preservation	\$270 million
Road and Bridge CPM	\$134 million
Total 2009-2013	\$964 million

*(Amounts are rounded to the nearest million dollars)*

Capital Preventive Maintenance (CPM) projects are planned for a significant number of pavements and structures that do not require extensive repairs during this Five-Year Transportation Program period. CPM projects are short-term fixes, adding from five to ten years of life to a pavement or maintaining the existing structure condition.

METRO REGION	Route Miles of Road	Number of Bridges and Structures
Total in Region	866	1,541
Scheduled Work	102	130
Percentage of Region	12%	8%

The 2009-2013 program for road preservation work reflects approximately 102 (12 percent) of the Metro Region’s more than 866 route miles of state trunklines during the next five years. The 2009-2013 program for bridge preservation work will address 130 (eight percent) of the region’s 1,541 trunkline bridges and structures.

There are also a number of programs that are selected based on statewide priorities or where project identification is completed throughout the year. These investments are not reflected above, but are included in the statewide investment strategy.
